

HomeMe

Problem vs. Solution

Problem

There are over 500,000 people facing homelessness in the United States. There are resources available that some of these people may not know are available to them.

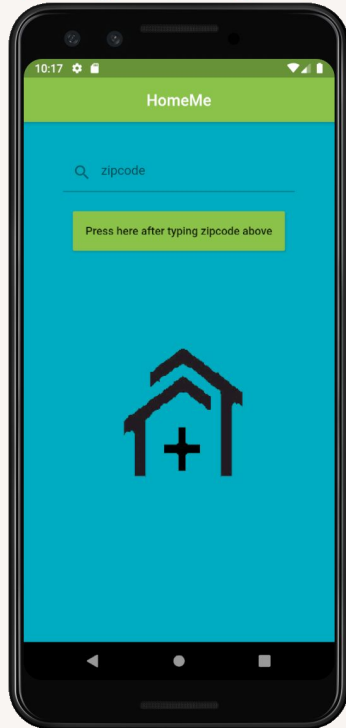

Solution

Create an app that informs anyone in need, of the resources available in their immediate area.

Implementation

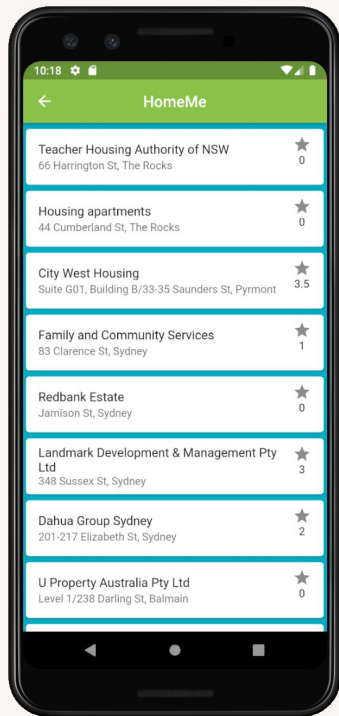

- Allows the user to search nearby housing and food banks by providing a zip code.
- Returns a list of nearby resources.
- Resources can be filtered to fit needs of the user.

How to Use

- 1 Insert Zip Code
- 2 List of available resources is shown
- 3 List can be refined to fit specific needs

How to Use

1

Insert Zip Code

2

List of available resources is shown

3

List can be refined to fit specific needs

How to Use

- 1 Insert Zip Code
- 2 List of available resources is shown
- 3 List can be refined to fit specific needs

Thanks!
